Re: 2021 Alley, Roadway and Water Main Improvements Project
Bid Opening Results and Recommendation

Dear Ms. Wells-Armstrong:

Proposals were received for the 2021 Alley, Roadway and Water Main Improvements Project on June 30, 2021 at the Village Clerk's office. Eleven (11) prospective bidders obtained plans and specifications for the project, with the Village receiving proposals from four (4) of the companies. A summary of the proposals received is as follows:

<u>CONTRACTOR</u>	<u>TOTAL BID</u>
Triggi Construction, Inc.	\$ 2,072,926.00
J. Nardulli Concrete, Inc.	\$ 2,113,236.60
M & J Asphalt Paving Company, Inc.	\$ 2,229,943.50
Swallow Construction Company	\$ 2,610,432.18
Engineer's Estimate	\$ 2,439,053.50

The lowest responsive, responsible bidder for this project was Triggi Construction, Inc., of West Chicago, Illinois. Triggi Construction, Inc. is a contractor that has completed work of similar scope recently within the Village of Maywood in 2016, 2018, 2019 and 2020, as well as surrounding communities, including the Village of Oak Park, Village of Carpentersville, and Village of Elmwood Park.

The contract specifies goals for the use of Disadvantaged Business Enterprise (DBE), which provides for contracting opportunities to minority owned businesses (MBE) and women owned businesses (WBE). The DBE Utilization Plan submitted by Triggi Construction, Inc. has been reviewed, and has adhered to the stated contract DBE goal requirements.

Based on previous experience with this contractor, the interview of contractor and subcontractor supplied references from other communities, and the review of their current work under contract, we find that the contractor is qualified to complete the work specified. The contractor also maintains the capacity to complete the project within the specified completion date of December 18, 2021. *We recommend that the Contract for the improvements be awarded to Triggi Construction, Inc., in the amount of Two Million, Seventy-Two Thousand, Nine Hundred Twenty-Six Dollars, and 00/100 (\$2,072,926.00).*

Scope of Improvements - Alley

The scope of work involving alleys includes the installation of an eight-inch (8") concrete pavement over a six-inch (6") aggregate base course and geotechnical fabric, concrete garage aprons and entry sidewalks, drainage improvements including catch basins and storm sewers connecting to the Village system, and landscape restoration.

The alley to be improved consists of the following:

Alley #200 – "L" Shaped Alley between 17th Avenue, 16th Avenue, North Maywood Drive, and Madison Street

Scope of Improvements – Roadway

The scope of work involving roadways includes resurfacing or full pavement reconstruction (dependent upon need), removal and replacement of concrete curb and gutter, replacement of concrete driveways, intermittent replacement of deteriorated sidewalk, placement of ADA compliance roadway crossings, repair/replacement of utility structures as needed, repairs to the combined sewer, replacement of drainage structures and sewer laterals at intersections, landscaping restoration, pavement markings, and other related improvements.

The roadways to be improved consist of the following, with highlights:

1. 3rd Avenue – Prairie Path to Wilcox Street
Approximately 400' linear feet of pavement will be reconstructed. The pavement reconstruction will include the installation of a geotechnical fabric, six-inches (6") of aggregate base course, and an eight-inch (8") thick Portland Cement Concrete pavement designed to carry industrial truck traffic loading. Complete curb and gutter replacement, sidewalk replacement, and parkway restoration will be performed.
2. School Street – 9th Avenue to 6th Avenue
Approximately 900' linear feet of pavement will be reconstructed. The pavement reconstruction will include the installation of geotechnical fabric, six-inches (6") of aggregate base course, and a six-inch (6") hot-mix asphalt pavement section. Complete curb and gutter replacement will be performed, along with driveway aprons.
3. South Maywood Drive – 19th Avenue to 17th Avenue
Approximately 600' linear feet of pavement will be reconstructed. The pavement reconstruction will include the installation of a geotechnical fabric, six-inches (6") of aggregate base course, and a six-inch (6") hot-mix asphalt pavement section. Complete curb and gutter replacement will be performed.
4. Warren Street – 5th Avenue to 4th Avenue
The pavement will be reconstructed between 5th Avenue and the alley east of 5th Avenue, with installation of geotechnical fabric, six-inches (6") of aggregate base course, and six-inches (6") of hot-mix asphalt, with the focus being to address on-street parking needs. Complete curb and gutter, and sidewalk replacement will be performed. The pavement

east of the alley to 4th Avenue will be patched as needed with an eight-inch (8") concrete base course, and then resurfaced with hot-mix asphalt.

5. 7th Avenue – Chicago Avenue to Rice Street, 4th Avenue – Lexington Street to Bataan Drive
Approximately 700' linear feet of pavement will be resurfaced to address an asphalt surface that has failed. The existing pavements will be milled down to the brick base course and resurfaced with 1" of hot-mix asphalt leveling binder and 2" of hot-mix asphalt surface course. The concrete curbs and driveways were recently replaced (1990's) and may remain in place without the expenditure of additional Village Funds.

Scope of Improvements – Water Main Improvements

The water main to be replaced consists of the following, with highlights:

1. Bataan Drive – 13th Avenue to 9th Avenue
Approximately 1,400' linear feet of existing six-inch (6") diameter water main in poor condition will be replaced with a new ten-inch (10") diameter water main. This section of water main has experienced numerous breaks in recent years. It is desired to improve the chokepoint on the Village system and provide improved circulation throughout the south section of town. The new water main will be placed beneath the south sidewalk / south parkway, and abandoning the existing water main in place. New valves, water main connections, fire hydrants, and other related appurtenances will be installed. Restoration of sidewalks, driveways, and landscaping within the south parkway will be performed.

Note that Alley #136 (North-South Alley between 5th Avenue, 4th Avenue, Quincy Street, and Adams Street) has been designed, and will be constructed in 2022 due to the need to relocate ComEd poles within the Right-of-Way and associated timeframe for ComEd to complete the work.

Costs

The project is primarily located within the boundaries of the Madison Street TIF. Certain streets are located outside of the Madison Street TIF and as such they will need to be paid for through use of the general fund. The water main improvements along Bataan Drive are eligible to be paid for through the water fund. A project breakdown of funding eligibility is as follows:

Madison Street TIF:	70.7%
General Fund:	7.2%
Water Fund:	<u>22.1%</u>
	100.0%

We have enclosed a copy of the complete bid tabulations for this project. We are also returning the original bids with a copy of this letter to the Village Clerk.

If you should have any questions, please call our office at your convenience.
